 Benchmark caps fit all standard GL45 Media Bottles
 *50ml bottles/GL32 caps not included in promotion

Borosilicate Glass

hybex™ reusable media bottles are manufactured from high quality, borosilicate 3.3 glass. With their superior chemical resistance, these bottles are ideal for storage of reagents, culture media, biological fluids and a variety of other aqueous and nonaqueous solutions.

A low coefficient of thermal expansion (3.3), provides temperature resistance that is far superior to that of standard lab glass (or soda lime glass). Hybex glass can withstand temperatures from -70 to 500°C, permitting repeated use in freezers, microwaves, autoclaves and dry heat sterilization chambers.

All hybex bottles have permanent, white enamel graduations for volume measurement and a white identification box for marking or coding.

All hybex media bottles include a drip-free sealing ring as well as a standard blue polypropylene (GL45) sealing cap. Bottles are also available with green, purple, white and yellow caps, or in an assortment pack containing two of each color.

- + Borosilicate 3.3 hybex glass
- + Autoclavable caps (GL45) & drip rings
- + Permanent enamel graduation markings
- + Large area for bottle marking/identification
- + Autoclavable, reuseable & breakage resistant

Technical Data

Material: hybex™ borosilicate glass (3.3)
 Cap Thread Size: GL45*
 Temp. Range: -70°C to 500°C
 Sterilization: Autoclave or dry heat
 Cap Material: Polypropylene (140°C)
 Cap Colors: Blue, green, purple, yellow, white or assorted

*50ml bottles are only supplied with blue GL32 sealing caps
