Gold Metal Plastisol Lined Caps

Gold Metal Plastisol Lined Caps

These gold metal plastisol lined caps are available in two sizes, 53 mm and 58 mm, and can be purchased by the bag or in bulk quantities. The gold metal plastisol lined caps are typically used on glass containers. Sometimes certain heating methods will heat the plastisol liner causing it to solidify creating a seal between itself and the container. As always be sure to test all products with closures for proper compatibility.
