Urisafe Polypropylene 24 Hour Urine Collection Containers

Urisafe Polypropylene 24 Hour Urine Collection Containers

The patented Urisafe® 24 hour urine collection containers are made of orange and white plastic and are user friendly to both patients and laboratory personnel.

Two sizes are available: 3-liter or a 4-liter size. The 4-liter size design allows urine to be poured into the tube simply by tilting the container forward without having to lift it. Both models feature large central handles, vertical and horizontal graduations, low form design, leakproof 79mm cap and a unique snap valve pour spout.
