Amber Glass E-C Sample Vials (Caps Not Included)

Amber Glass E-C Sample Vials (Caps Not Included)

These amber glass E-C sample vials are part of the organic series and are sold without closures (caps may be purchased separately). With all the organic vials, type 1 glass is the only surface that will make contact with your sample.

These sample vials are economically priced and conveniently packed in shrink-wrapped case packs. This packaging reduces contamination from corrugated material found in more traditional packaging.

Compatible caps are also available, sold separately. Be sure to match up the neck finish of the vial with the size of the cap for proper compatibility.

Stock #	Description	Price/Cs	Case Pk
