Lab Bottles, 24 Hour Urine Collection, HDPE Orange Bottle, Spout Cap

These easy-to-use patented HDPE URISAFE® 24 hour urine collection containers offer many features. The leakproof polypropylene cap has a unique snap valve pour spout, easily pull the tip of the cap to open and push to close. Both lab bottle sizes feature a large, comfortable handle to grasp for easy transport. The patented URISAFE® urine collection containers are user friendly to both patients and laboratory personnel. The 4 liter model is designed to help safely and accurately transport samples from a URISAFE® collection container to a test tube. Simply tilt the container forward without lifting, to slowly dispense the contents into a tube.

These URISAFE® containers come packaged in a single box, B350 in a box of 40 and B350-4L in a box of 30.
