

Centrifuge Tubes, 1.5 ml Natural Polypropylene Economy Microcentrifuge Tubes

The least expensive of our Microcentrifuge Tubes, these are good for all applications (excluding boiling) including storage and reactions. These 1.5 ml graduated tubes are made of laboratory grade polypropylene that is suitable for high speed centrifugation up to 20,000g. The one-piece construction incorporates a snug fitting cap. The bottom of these tubes is reinforced for added protection against leakage. They boast a frosted writing surface on the lid and on the side of the tube which allows for easy and convenient sample identification. Highly polished interior ensures low liquid retention.
