

Plastic Lab Vials, Sterile Polypropylene Cryogenic Vials w/ Red Silicone O-Ring Seal and Caps

Sterile polypropylene cryogenic lab vials offered here include red silicone o-ring seals and ribbed caps, also composed of polypropylene, ensuring the same coefficient of expansion. The red silicone o-ring seal assists with ensuring a leakproof seal at all temperatures during use. These sterile plastic lab vials are available with free standing and round bottom options in a large variety of sizes with graduations. Please note only the rounded bottom plastic lab vials can be centrifuged up to 17,000g. Offered in two different case pack options, both are packaged with 100 lab vials per bag. These plastic bags are tamper evident, resealable, safety-lock bags.
