

Laboratory Equipment, LC-8 Centrifuge w/ 8 X 15ml Rotor

The LC-8 laboratory centrifuges include a digital microprocessor which confirms the lid has been closed correctly, and will not allow the lid to open until the rotor has come to a complete stop. The advance imbalance detector continually monitors the balance and vibration of the centrifuges and brings the rotor to a halt if an imbalance occurs. The easy to use menu allows you to fully control the run times and rotational speeds, viewed in rpm or rcf. Acceleration/deceleration levels are adjustable, with a timer setting option to keep track of your centrifuge cycles. Choose between C3100 and C3200 depending on the top speed needed for your cycles, and purchase the additional adapter for more variety in test tube compatibility to the LC-8 laboratory centrifuges.

Description	Stock #	Case Pk	Price/Cs
Lab Equipment, LC-8 Centrifuge w/ 8 x 15ml Rotor	C3100	1/cs	\$352.75
Lab Equipment, LC-8 Plus Centrifuge w/ 8 x 15ml Rotor	C3200	1/cs	\$508.30
Lab Equipment, LC-8 Centrifuge w/ 8 x 15ml Rotor (European Plug)	C3100-E	1/cs	\$352.75
Lab Equipment, LC-8 Plus Centrifuge w/ 8 x 15ml Rotor (European Plug)	C3200-E	1/cs	\$508.30
Lab Equipment, Optional Adapter Pack, Accepts 5ml & 7ml Tubes	C3100-ADP	8/cs	\$79.05
Lab Equipment, Optional Adapter Pack	C2570	4/cs	\$39.00
