

## Burette Clamps, PP Burette Clamps

These spring loaded polypropylene burette clamps allow a clear view of the graduations over the entire length of a burette. The arms are fitted with rubber grips to prevent slipping, and the central boss features a conical compression piece which provides a firm grip on rods 11-14 mm in diameter. These clamps are available as single or double model.

\*Factory Ship Item, allow 3 to 5 days for shipment.
