

Test Tube Holders, Polypropylene Test Tube Racks

These polypropylene test tube racks hold up to 90 13 mm test tubes, and provide excellent stability with no tendency to float or move in circulating water baths. An alpha numeric grid reference on the top tier enables precise location in the rack of particular samples. Available in three colors for easy identification. Shipped flat, easily and permanently snapped together to save shipping expense and reduce shelf space needed in storerooms.

*Factory Ship Item, allow 3 to 5 days for shipment.
