

Ohaus Scales, Explorer® Analytical Balances

Buy any Explorer Balance & receive the choice of a mini hotplate, mini stirrer, fixed speed vortex mixer, portable pH meter, or a mini centrifuge FREE!

The Explorer Analytical balances have built-in features for quick, accurate and straightforward use in a variety of laboratories. The 5.7" full-color touch screen has a full virtual QWERTY and numeric keypads, audible and visual feedback for input commands, an indication of the check weighing status and if the unit is below the minimum weight. The durable stainless steel base will provide superior shock protection, is easy to clean and can separate from the display during use to provide flexibility in setup. Each lab scale will include a glass draft shield that has been coated to prevent static interference during weighing. With a top or side opening the draft shield provides options for placement of the units being measured and fast cleaning. Explorer Analytical balances allow the most sophisticated measurements in high pace or rugged laboratories to be exceedingly simple and faster than ever before.

*Factory Ship Item, allow 3 to 5 days for shipment.
