

Glass Test Tubes, Glass Culture Tubes w/ Black Rubber Lined Caps

Opt for these autoclavable glass test tubes offered with black screwthread caps. The liners in these caps are white styrene-butadiene rubber liners, and offers further protection for samples. The glass tubes are manufactured from "300" borosilicate clear glass (meets ASTM Type I Class B and USP Type I standards). These glass test tubes can be used for slant or shake cultures, and can be reused several times. Case packs of these culture tubes come with caps attached to the tubes, and in cartons of 144 tubes, divided by partitions.
