

Plastic Lab Vials, Polymer High Recovery Vials w/ Glass Inserts & No Caps Included

SKS Science a range of high recovery plastic lab vials to reach your laboratory needs. Select from amber or clear thermoplastic polymer, providing excellent dimensional tolerance reliability for capping and instrumentation use, and safety from breakage as well. Within the plastic lab vials are type I amber borosilicate glass inserts that will only be material in contact with your samples and the seal chosen. The clear and amber plastic lab vials are available with screw top or crimp finishes to pair with the desired closures that are sold separately.
