

Glass Lab Vials, Gold Band Pre-Scored Amber Glass Ampule Lab Vials

Amber glass ampules have the option to be hermetically sealed to preserve and extend the shelf life of your laboratory samples. These amber glass lab vials are ideal for standards packaging, environmental standards, diagnostic standards, and cryogenic storage. The gold band pre-scored feature eliminates filling while including a tamper evident seal for reducing sample contamination. The included stem can be pull sealed or tip sealed for closing the amber glass lab vials.
