

Glass Lab Vials, Clear Glass Scintillation Vials w/ White PE Lined Polypropylene Caps

Clear glass scintillation lab vials are paired with white polypropylene caps that feature PE-F217 liners are sold here with the caps attached or not attached to fit your needs. These clear glass lab vials are composed of 180 low potassium borosilicate glass, which meets ASTM Type I Class A and USP Type I standards. The ultraviolet transmission of these glass lab vials is high, while the background counts are both consistent and low. The case packs are made up of 5 trays with 100 lab vials in each and will be shrink-wrapped if caps are not attached.
