

Glass Lab Vials, Amber Glass Sample Lab Vials In Partitioned Tray w/ Solid Top Black Phenolic Rubber Lined Caps

Amber glass sample lab vials are apart of the aqueous series and paired with solid-top black phenolic closures with 14B white rubber liners providing substantial resistance to chemicals, acids, and bases. When purchased, these amber glass lab vials will have the caps attached and packaged in Lab File corrugated trays with partitions. The amber glass lab vials and black phenolic caps are ideal for general sampling needs within your laboratory and can be autoclaved.
