

## Plastic Carboys, 6 Gal Clear PET Carboys and Accessories

These 6 gallon plastic carboys are constructed of food grade PET and available in two dispensing options. The first option includes two red plastic caps; a solid red polypropylene cap, as well as a red screw cap with a hole that is compatible with #10 stoppers (sold separately). The second kit features a solid red plastic cap, and a spigot located near the carboy's base. Both plastic carboys feature smooth sides that promote easy cleaning and the prevention of yeast and sediment build-up on the walls. This allows the carboys to perform well for continual use. With a 4" opening and molded graduation marks at the 5 and 6 gallon marks, these clear carboys can be utilized in various laboratory applications.
