

## Pipettes, NextPette™ Pipette Combo Pack

NextPette™ pipettes have design features with the user in mind. For less hand fatigue and more comfortable use, NextPette™ pipettes include an ergonomic elliptical shaped plunger button that requires a low amount of force. Each size consists of a four digit volume display located above the pipette handles that faces the user for precision reading. Volumes can be adjusted one-handedly, and lock into place for accurate dispensing repetitively. For fast and convenient purchasing each combo pack includes four pipettes, and one carousel stand for convenient storage. The entire pipettes are autoclavable at 121° C, resistant to UV exposure, and offer universal tip compatibility. All of the NextPette™ pipettes have been vigorously tested and calibrated in accordance with ISO 8655.
