

Plastic Lab Vials, Clear PET Scintillation Vials w/ Metal Foil Lined Urea Caps

Available here are clear PET scintillation plastic lab vials paired with white urea metal foil lined caps. These plastic lab vials include the high clarity of glass with the added safety of plastic and can be incinerated with only CO₂ and H₂O gases generated during incineration. SKS Science offers the options of the white urea caps attached to the plastic lab vials or packaged separately shrink wrapped in plastic. The case packs of 500 will include five 100 lab vial trays, and the 1,000 cases of plastic lab vials are packaged in a single bag with the caps in a separate bag.
