

Microcentrifuge Tubes w/ Graduations

The 1.5 ml polypropylene microcentrifuge tubes are available in cases of 1000 pieces (2 bags of 500). Offering easy identification, these tubes come in a variety of colors: amber, orange, green, blue, yellow, and natural. These tubes are also available in a rainbow pack which contains 600 pieces (100 pieces of each individual color). The microcentrifuge tubes have attached lids providing tight, leak proof seals, yet can still be easily opened, even when wearing gloves. The lids are also of a uniform thickness to ensure trouble free piercing. All of these tubes feature frosted writing areas for labeling identification purposes, and have graduations in .5 ml increments. These polypropylene microcentrifuge tubes are autoclavable.

= Combo Kit

= Autoclavable Labware
