

Laboratory Equipment, Digital Dry Baths

The BenchMark series of digital DryBaths offer digital control over both temperature and time, eliminating the need for an external thermometer or timer. Available in three configurations, the digital dry baths offer capacity for up to four blocks (96 x 1.5/2.0ml microtubes).

The cavities of the high grade aluminum blocks are precision machined to match the conical size and shape of 0.5,1.5, 2.0, 15 and 50ml tube sizes, providing unsurpassed temperature uniformity. Nine assorted blocks are available in total for compatibility with nearly all common tube sizes.

All models include a convenient block lifter, for transferring blocks with high temperatures.
