

SC6 120V Colony Counter & Accessories

Ideal for all microbiology applications, the SC6/120V/60 colony counter provides fast and accurate counting of bacterial and mold colonies. The SC6/120V/60 colony counter is easy to use. Simply place the Petri dish on the electronic pressure pad and touch the dish with a felt tip pen to mark each colony. The touch pressure causes a count to be registered on the digital display and an audible tone confirms each count made (the sound can be switched on/off as desired).

This colony counter is supplied complete with one Wolffhuegel graticule, one segmentation disc and two centering adapters for standard Petri dishes. A choice of magnifiers is available to aid easier counting of smaller colonies.

Description	Stock #	Case Pk	Price/Cs
