

Ice Bucket, Reusable Plastic Labware

The Azlon® reusable plastic ice bucket features durable, rigid polyurethane skinned-foam construction. Excellent insulating properties, suitable for use with liquid nitrogen, dry ice, water ice and solutions. Octagonal design will not deform and is very stable when full. Flush lid with recessed handle means buckets can be stacked for storage. Offering a 4.5 liter capacity, this ice bucket will not sweat or leak, is resistant to acetone, and can be chemically disinfected.
