

Test Tubes, Biotube™, Natural Polypropylene Cluster Tubes w/ Plastic Caps

These polypropylene Biotube™ test tubes are available in detachable strips of 8. The plastic tubes are autoclavable, and the plug caps are not. The test tubes house 1.2 ml of specimen with out caps, and 1.1 ml with plug caps securely in place. These plastic test tubes could be used for cell harvesting, pharmaceutical quality control, RIA and EIA, HTLV-III testing, receptor binding assays, and bacterial and hybridoma cell uptake studies. These cluster tubes are packaged in bags of 120. Browse the add-ons for compatible Biotube™ storage racks.
