

Test Tubes, Biotube™ Natural Polypropylene Cluster Tubes w/ Plastic Caps

Opt for these polypropylene Biotube™ test tubes for cell harvesting, bacterial and hybridoma cell uptake studies, RIA and EIA, HTLV-III testing, pharmaceutical quality control or receptor binding assays. The plastic tubes are autoclavable, however the plug caps are not. Both tubes and plug caps come in detachable strips of 12. The test tubes gross volume is 1.2 ml without the plug caps, and 1.1 ml with the plug caps. These cluster tubes are packaged in bags of 80. Browse the add-ons below to view compatible tube storage racks.
