

Lab Pipettes, To Deliver Class A Glass Volumetric Pipettes

Opt for these class A glass volumetric pipettes for a variety of general laboratory uses. These pipettes are calibrated to deliver. This means they are designed to deliver the amount of fluid shown within ± 0.01 ml. Each size is labeled with a marking on the bulb, and color coded (ASTM E1273) for easy identification. These KIMAX® brand pipettes are offered with a Certificate of Graduation Accuracy. They were carefully selected to meet the requirements for accuracy, glass quality, calibration line, appearance, and inscription of former NBS Circular 602. Sizes 1 ml through 10 ml are packaged in 2 cardboard boxes with 6 pipettes in each. The 20 ml and 25 ml come in 6 cardboard boxes with 2 pipettes in each. Case packs of 50 ml pipettes are packaged in 8 cardboard boxes each containing 1 pipette, and the 100 ml pipettes come in 6 boxes also with 1 pipette in each. Pipettes are placed in individual slots in styrofoam inserts inside the boxes.
