

Microscope Supplies, StainTray Slide Staining System For 10 Microscope Slides

This tray is suitable not only for routine staining requiring a humid chamber but is also ideal for Hematology, Cytology and Microbiology laboratories. Manipulation is made safe and easy by using only one hand. The StainTray has a black base made of tough ABS plastic withstanding a wide range of chemicals (avoid chlorinated hydrocarbons). It will accept up to 10 slides on four plastic rails covered with a polymer strip to hold slides even if tray is held at an angle. When humidity is needed, wells between rails will hold up to one ml of water securely without splashing. Middle wells will hold up to 2 ml each. Rails are raised not only to avoid water touching the slides but to make them more easily retrieveable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space saving purposes.

Two covers are available:

• A clear one allowing for visual examination. Made of PETG with a temperature range of -20°C to +60°C.

• A black lid for fluorescent work. Made of ABS with a temperature range of -80°C to +80°C
